

NovaTec Immundiagnostica GmbH is engaged in the development and manufacturing of ELISA diagnostic kits with emphasis on infectious diseases. Our kits are used for diagnosis of bacterial, viral and parasitic diseases.

For the veterinary field, our proprietary technology allows us to develop diagnostic assays able to detect either pathogen specific IgG or IgM antibodies from all mammals and is consequently suited for veterinary serological assays.

We will continue to work on the development of new assays for the veterinary market in order to expand our portfolio. Please contact us to discuss your specific needs.

Diagnostic Assays for pets and livestock

Advantages of the VetLine Elisa kits:

Ready to use reagents	Easy to use on automated systems
Standardized procedures	Snap-off microtiter strips
EIAs with cut off control	Long shelf-life
Color coded reagents	Type of samples vary depending on assay: serum, plasma, urine, milk

Veterinary - ELISA Kits Available

Anaplasma
Ascaris
Aspergillus
Borrelia
Brucella*
Candida
Canine Distemper
Clostridium tetani
Coxiella Phase 1*
Coxiella Phase 2*
Dirofilaria Antigen / Antibody
Echinococcus*
Entamoeba
Fasciola
FCoV/FIP
FelV Antigen
FIV
Hanta Virus
Influenza Virus A
Influenza Virus B
Legionella

Leishmania
Leptospira Antibody / IgM
Parainfluenza Virus
Parvovirus
Rheumatoid factor
Strongyloides
Taenia
TBE/FSME
Toxocara
Toxoplasma Antibody / IgM*
Trichinella
Trichuris
West Nile Virus*
<u>Hormones</u>
T3 and Free T3
T4 and Free T4
Cortisol
Estradiol
Progesterone
Testosterone

* No FLI Registration (not available for the German market)
